DETAILED ACTION

Election/Restrictions

The traversal is on the ground(s) that there is no serious additional burden on the Examiner. This is not found persuasive because the section cited by Applicant is concerning Restriction Requirements, not Elections of Species. Additionally, Applicant has not provided a showing as to why there would be no serious burden to the Examiner to address these claims. Therefore, claims 12-20 are withdrawn from further consideration as being drawn to a nonelected invention

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 34, it appears that the language therein is misdescriptive. It appears that “third” should be changed to --second--.

Claims 2-11 are rejected as including the indefiniteness discussed above with claim 1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Tsukada (USPN 5,521,547). Tsukada discloses, in Fig. 2A, a circuit comprising: “a first relaxation circuit (Q1)”;

Art Unit: 2816

“first (drain of Q1 connected to Vcc) and second (N1) nodes”; “a second relaxation circuit (Q2)”; “third (drain of Q2 connected to Vcc) and second (N2)”; “a first charge pump (C1 and IV1)”; “a second charge pump (C2 and IV2)”; “a third charge pump (C4 and Q6)”; “a fourth charge pump (C3 and Q5)”; a first rectifier MOSFET (Q3)”; “a fifth node (Vout)”; and “a second rectifier MOSFET (Q4)”, all connected and operating similarly as recited by Applicant.

Claims 2-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. None of the cited prior art references, except the reference to Jeong, teach that the “relaxation circuits” comprise two series-connected “MOSFETs”. With respect to the circuit to Jeong, such does not disclose that the outputs of the “third charge pump (C104 and PM110)” and the “fourth charge pump (C103 and PM107)” are connected to the “first charge pump (C101 and PM102)” and the “second charge pump (C102 and PM104)”, respectively.
